(54) Title: ELECTROTHERAPY METHOD AND APPARATUS

(57) Abstract

A method and apparatus for delivering a multiphasic waveform to a patient. The preferred method comprises the steps of charging an energy source to an initial level; discharging the energy source across electrodes to deliver energy in a multiphasic waveform; monitoring a patient/dependent electrical parameter during the discharging step; shaping the relative duration of the phases of the multiphasic waveform based on a value of the monitored parameter. The preferred apparatus comprises an energy source (32); two electrodes (36); a connecting mechanism (34) forming an electrical circuit with the energy source, and the electrodes when the electrodes are attached to a patient; and a controller (38) operating the connecting mechanism to deliver a multiphasic waveform, the relative phase durations of which are based on an electrical parameter monitored during delivery of the energy. The preferred defibrillator weighs less than 4 pounds and has a volume less than 150 cu.in.

INTERNATIONAL SEARCH REPORT

 International application No.
 PCT/US94/08134

A. CLASSIFICATION OF SUBJECT MATTER

IPC(6) : A61N 1/39

US CL : 607/005

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

U.S. : 607/002, 004, 005-008, 036, 062, 074

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched
NONEElectronic data base consulted during the international search (name of data base and, where practicable, search terms used)
NONE

C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category*	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
X	US, A, 3,860,009, (BELL ET AL.), 14 January 1975. See entire document.	13, 14
X, P	US, A, 5,372,606, (LANG ET AL.), 13 December 1994. See entire document.	15, 16
Y	US, A, 4,473,078, (ANGEL), 25 September 1984. See column 3, lines 37-54.	33
Y	US, A, 5,230,336, (FAIN ET AL.), 27 July 1993. See entire document.	33

☐ Further documents are listed in the continuation of Box C.
 ☐ See patent family annex.

* Special categories of cited documents:	"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
"A" document defining the general state of the art which is not considered to be part of particular relevance	"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
"E" earlier document published on or after the international filing date	"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
"I" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)	"Z" document member of the same patent family
"O" document referring to an oral disclosure, use, exhibition or other means	
"P" document published prior to the international filing date but later than the priority date claimed	

Date of the actual completion of the international search

21 FEBRUARY 1995

Date of mailing of the international search report

17 MAR 1995
